

## VIRTUAL HEARING HELPERS Free One-on-One Tutoring

### Virtual Hearing Helpers

adapted better than others. In many instances, hearing impaired students are struggling with this change in learning style. Unfamiliarity with remote learning coupled with a hearing impairment can negatively impact students' grades.

The coronavirus pandemic has thrust teachers and students alike to remote learning. This sudden change has greatly influenced students learning process and routine. Due to the pandemic, students must rely on iPads for instruction and in many districts cannot visually see their teachers or classmates due to privacy concerns with these apps in public schools. Consequently, some students have

Please allow me to introduce Matthew and Jason Nejat, brothers from Long Island who both have a bilateral hearing loss and have created the **Virtual Hearing Helpers** Program. They are offering help by connecting with hearing impaired students that are struggling by providing free, one-on-one, virtual sessions in which they provide homework help and tutoring in all core classes for grades 4-9. If you would like to learn more about Virtual Hearing Helpers, parents and students can click "[HEAR](#)" to view their informational flyer or email [virtualhearinghelpers@yahoo.com](mailto:virtualhearinghelpers@yahoo.com)

#### Learn More about your Virtual Hearing Helpers:

**Matthew Nejat** was born with a bilateral sensorineural moderate hearing loss and has been wearing hearing aids since 3 months of age. He is currently the President of his sophomore class and takes his academics very seriously, but always makes sure he has time for family, friends, and hobbies. He enjoys playing on school sports teams that include soccer, tennis, and track. Last summer he was a ball boy for the US Open Tennis Tournament and worked for a real estate company.

**Jason Nejat** was born with a bilateral moderate hearing loss and has been wearing hearing aids since he was an infant. He is currently President of his freshman class. His strengths are math and science and he also enjoys sports including tennis, soccer and wrestling. Last summer he worked at Generation Next Fertility, a doctors office specializing in infertility and IVF. It was a very positive experience for him as he plans on becoming a doctor.

Jason (left) and Matthew (right) both have a 4.0 GPA in accelerated and advanced classes at Great Neck North High School.
