Days

Weeks

Months

Years

Tips for Health Care Providers

- ➔ Get the persons attention and make eye contact before speaking.
- ➔ Speak normally and at a natural pace, unless you speak very quickly.
- ➔ Remember, if you are wearing a mask it will be impossible to lip read, so...
- ➔ Repeat, rephrase, or write down your request.
- ➔ Know that while hearing aids/cochlear implants may improve hearing, many wearers still may not be able to understand all or parts of what you say.
- ➔ Be patient. :-)
