General Information

The Hearing Health Foundations reports that tinnitus and hearing loss are the number one and two health conditions, respectively, among military veterans at U.S. Department of Veterans Affairs (VA) medical centers.

According to the U.S. Department of Veterans Affairs (VA), more than 2.7 million veterans currently receive disability benefits for hearing loss or tinnitus, a ringing in the ears.

Veterans are 30 percent more likely than nonveterans to have severe hearing impairment, according to a Centers for Disease Control and Prevention analysis.

Intensity of Sounds Measured in Decibels (dB)

- Normal conversation is considered to be “safe” at a sound level of 60 decibels.
- On flight decks, noise levels are around 130 decibels.
- Helicopter noise is around 100 decibels.
- A soldier near an M60 machine gun is exposed to 150 decibels
- Within 50 feet of an exploding grenade, 160 decibels.

Support Groups

Veterans Crisis Line: Support for Deaf and Hard of Hearing

Online Chat, Text Message, Phone call, and TTY service

<https://www.veteranscrisisline.net/get-help/hard-of-hearing-veterans>

Professional, caring VA responders through online chat, text message (838255), and TTY service 800-799-4889

Hearing Loss Association of America (HLAA)

The Nation’s Voice for People with Hearing Loss

Assistive Technology and Financial Assistance

Today, there is a multitude of assistive devices available to help give individuals who are deaf and hard of hearing gain more independence. These devices are designed to help in all areas of life, such as amplified phones, doorbells and telephone ringers, baby cry signalers, visual and vibrating alarm clocks, smoke detectors, etc.

Kentucky Department of Veteran Affairs

If you are a veteran with hearing loss you may be eligible for compensation. Please contact your local KDVA Field Benefits Representative or call 502-595-4447 for more information.

What KCDHH Can Do for You

Federal and state laws are in place to protect individuals with disabilities from discrimination. These laws were designed to give equal access and opportunities to all persons with disabilities, including individuals with hearing loss.

For an individual with a hearing loss, equal access typically means effective communication. Effective communication usually requires some form of accommodation and due to the diverse needs of deaf and hard of hearing individuals, the specific accommodation will depend on the individual.

What this all means is that you have the right to effective communication when it comes to employment, education, housing, government as well as public and private services.

KCDHH as an information, referral and advocacy agency can help educate you and others about your rights, how to ensure effective communication and advocate on your behalf when your needs are not being met.

KCDHH also produces the biennial Kentucky DeaFestival and the following materials: Directory of Services, Communicator newsletter, and brochures on topics of interest to deaf and hard of hearing persons and their families. KCDHH maintains a library of books, periodicals, DVDs and CDs which are available for research and general information. The KCDHH Telecommunications Access Program (TAP) provides devices such as amplified phones, wireless devices and CapTels to eligible deaf and hard of hearing Kentuckians.
